# THE MOST, AND THE LEAST, VALUABLE BUSINESSES IN AMERICA 

Buying a business is, in at least one respect, like buying a house-you can learn a lot by looking at the comparables. The tables below tell you what businesses are selling for in 122 industries. For each one, the tables note the number of businesses sold in the survey period and the median annual revenue and sale price. The line graphs to the right show each category's sale price range, from low to high; the diamond in the middle marks the median sale price. On the tables' far right are six valuation multiples for each industry; in each case, we've highlighted the three most relevant (four in the case of ties), given the transactions in that industry.

| Data based on transactions from 1/1/2007 to 3/31/2009 DIVISION/Type of Business (Number of transactions) | Median Annual Revenue (\$000's) | Median <br> Sale <br> Price <br> (\$000's) | Sale Price Ranges | s Low Median High |  | MEDIAN VALUATION MULTIPLES <br> (Best, second best, and third best multiples) |  |  |  |  |  |

GLOSSARY: BVIC (Book Value of Invested Capital) = (Total Assets - Total Liabilities) + Long-Term Liabilities; Discretionary Earnings $=$ Operating Profit + Owner's Compensation + Noncash Charges; EBIT $=$ Operating Profit;
EBITDA = Operating Profit + Noncash Charges; Gross Profit = Net Sales - Cost of Goods Sold; MVIC (Market Value of Invested Capital) = Reported Selling Price (includes noncompete value and interest-bearing debt;
excludes real estate, consulting agreement values, and contingent payments); Net Sales = Annual Sales - Returns and Discounts

## CALCULATE YOUR COMPANY'S VALUE

Use this work sheet to get a rough estimate of what your business might fetch in today's market. First, find your industry in the preceding tables and note the three best valuation multiples. Enter those figures into the appropriate boxes in the Multiple Value column below. Next, insert the appropriate financial information in the corresponding boxes in the middle column. (This may require some help from your accountant or CFO.) In all three cases, multiply the dollar figure by the multiple and enter the sum in the far right column. Average the figures - and there's your number. This will be a very rough estimate, but a useful starting point.

Top Three Indicators for
Your Industry (Check yours off)

[^0]:    GLOSSARY: BVIC (Book Value of Invested Capitall) = (Total Assets - Total Liabilities) + Long-Term Liabilities; Discretionary Earnings = Operating Profit + Owner's Compensation + Noncash Charges; EBIT $=$ Operating Profit
    EBITDA = Operating Profit + Noncash Charges; Gross Profit = Net Sales - Cost of Goods Sold; MVIC (Market Value of Invested Capital) = Reported Selling Price (includes noncompete value and interest-bearing debt;
    excludes real estate, consulting agreement values, and contingent payments); Net Sales = Annual Sales - Returns and Discounts
